

Intravenous infusion – One compartment – Crossover study design
Two occasions

Model	OFV	Population estimate (%SE)	Between subject variability (%SE)	Between occasion variability (%SE)
	13669.1			
CL (L/min)		1.2 (5.9)	25% (30.3)	31% (29.8)
V (L)		16.4 (6.2)	22% (62.8)	35% (29.8)
Residual variability				
Proportional error		4% (29.1)		
Additive error		675 ng/ml (34.2)
